1. The Source of the information contained in this IR is the chief chemist for an Austrian POL firm. The firm's president is the Austrian go-between on all POL matters dealing with the Soviet Trade Commission, VIENMA, Austria. The Austrian firm, on many occasions during the past year, has been utilized as a middle man by the Soviet/Satellite nations to conduct various trade dealings. The information in this report was gleaned from a letter of inquiry, dated 9 March 1957, directed to the Hocker Electro-Chemical Company, Mingara Falls, New York.

- 2. The Soviet Trade Commission, VIEBNA, Austria, was directed to secure a source of supply of fluorolubes. The Trade Commission requested their Austrian go-between to find and to purchase up to 200 tons of fluorolubes. Pluorolubes are lubricants which are thermally stable up to 300°C and are not effected by concentrated acids and/or oxidising agents. The Trade Commission informed the Austrian firm that these lubricants are necessary and urgently needed to carry out experiments in the Soviet Union.
- 5. The Austrian firm has sent a letter of inquiry to the Hooker Electro-Chemical Company, Fiagara Falls, New York, dated 9 March 1957.
- 4. The Source of this information is a tested Source and such of his information, in the past, has been proven accurate by cross-checking. If this deal on fluorelubes goes thru between the Austrian and US firm, the lubricants will most certainly end up in the support of some Soviet research and development program.
